

FERTILITY MEDICATIONS LIST

This is a list of common medications that fertility centers frequently prescribe, and will vary depending on the protocol a physician has chosen.

Review the medications you receive in advance (when possible) to feel prepared at the start of your cycle. Highlight the medications below you have been prescribed.

Leuprolide 14-Day Kit (Lupron)

Follistim

Gonal F

Menopur

Ganirelix

Cetrotide

HCG

Ovidrel

Progesterone in Oil

Endometrin

Crinone

Jot any questions here to remember and ask:

Important: Not all of these medications will be prescribed to you. This is just a list of common fertility medications used. Some other medications that do not appear on this list may be included in your treatment protocol (ask your fertility doctor).
